air sniper ™

**WHEN IT COMES TO YOUR
AIR PURIFICATION, WE TAKE A
STRAIGHTFORWARD APPROACH.**

Competitive turnkey supplemental air sanitization system technologies available in portable or in-system with minimal maintenance. The protection you need is ready to go and customizable for your business.

air sniper

Induct 300W

BAS COMPATIBLE

Works with most Environmental Monitoring Systems (EMS) or Building Automation Systems (BAS). No need to replace your existing HVAC controls or to add substantial hardware to your data center.

MINIMAL INSTALLATION COSTS

Air Sniper Induct 300W units are simple to install in both new and existing HVAC systems, minimizing overall time requirements and project costs.

YEARS OF MAINTENANCE-FREE SERVICE

Featuring a 55,200 hour lamp life with absolutely zero maintenance, the Air Sniper Induct 300W is a work-horse that minimizes ongoing facility costs.

FLEXIBLE SYSTEM DESIGN AND INTEGRATION

- Air Sniper can be placed in many different sections of the Air Flow.
- Air Sniper can be placed in the Return Air Section (10) to ensure 100% of return air is treated.
- Air Sniper can be placed in the Filtration section (7,8) to ensure 100% of air is treated prior to redistribution.
- Air Sniper can be placed within the Air Handler prior to cooling Section (4) to ensure 100% air treatment.
- An electrostatic filter can substitute a HEPA filter (8).

LEGEND

- 1** Supply Air
- 2** Supply Fan
- 3** Cooling Coil
- 4** Air Sniper
- 4B** Air Sniper Frame
- 5** Electric Heating Coil Option
- 6** Hot Water Coil Option
- 7** Pre-Filter
- 8** Electrostatic Filter
- 9** Air Blender
- 10** Return Air Damper
- 11** Fresh Air Damper

Spectrum 800™

Air Sniper Spectrum 800™ units offer complete protection without disruption, this stand-alone, portable unit is whisper quiet, easy to move around and Bluetooth enabled for remote monitoring and control.

PORTABLE

The Air Sniper Spectrum 800™ unit is easy to move around to the spaces that need it most and with Bluetooth monitoring, you can effortlessly control your protection from just about anywhere.

WHISPER QUIET

Air Sniper offers protection without disruption, unlike traditional stand-alone units. The Spectrum 800™ can be plugged into any room to provide superior protection without additional background noise.

BLUETOOTH COMPATIBLE

All Air Sniper Spectrum 800™ units are Bluetooth enabled so that you can monitor and control your protection from any room.

DCU 300W

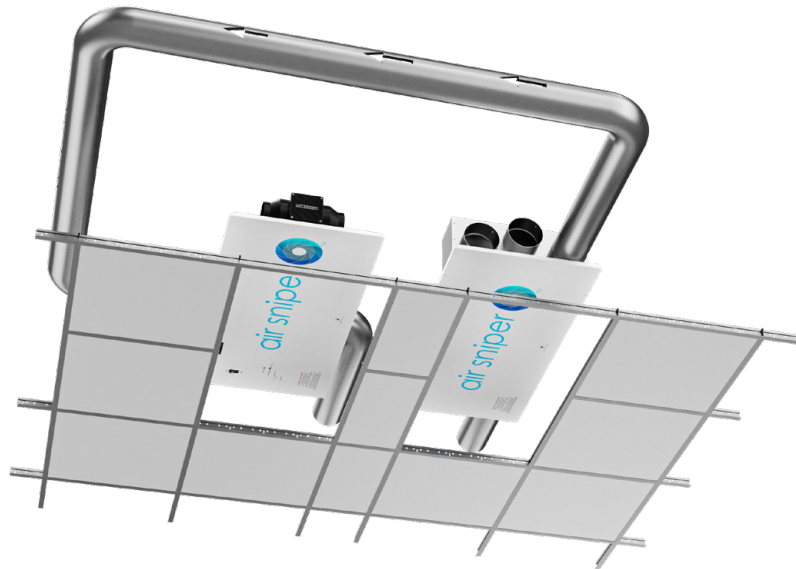

The DCU 300W installs into drop ceilings to clean multiple rooms with one unit. The plug-and-play design requires no additional electrical work while providing continuous protection from airborne contaminants. The DCU includes Bluetooth app-enabled scheduling and an optional motion sensor.

EFFICIENT DESIGN

Continuously sanitizes multiple spaces with a single unit, while having an adaptive design with a simplified installation process.

YEARS-LONG LIFESPAN

The DCU 300W has a 6+ year lifespan and comes with a 5-year warranty, minimizing overall facility maintenance costs.

Considerations when looking for a solution

- How does the solution work and fit into your buildings?
- Do you have solutions for all spaces such as: washrooms, cafeterias, gymnasiums, and large classrooms?
- What are the long term costs of ownership and 5-year maintenance requirements?
- Environmental impact and sustainability, are consumable parts required to service the solution?
- What is the life expectancy of the solution?
- How is the solution installed and maintained?
- Are there potential health risks associated with the operation of the solution?
- Does the solution provide any additional noise to the space?
